**Description and learning objectives:**

Tooth whitening has become easy, rewarding and profitable. New systems are being brought to market at a dizzying pace. Should I do a chairside or take home bleaching? Do the over-the-counter whitening products work and how do I incorporate them into my clinical practice? What about a combination of chairside and take-home? Are they worth it? In this CE webinar, we will review the different systems on the market as well as those on the horizon. The pros and cons of bleaching will be covered, as well as the use of different light sources to speed up the whitening process. Issues of sensitivity, mechanism of action and longevity will be discussed. Materials in this webinar will rely on scientific evidence from the literature as well as from clinical experiences. During this CE webinar, you will

- Understand options for whitening
- Learn how whitening works at the ion level
- Describe how sensitivity can occur with tooth whitening
- Discover potential treatments for post-operative sensitivity
