Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** The Bleaching Spectrum: A Dental Team Approach Across Specialties (5214)

**Lecturer:** Dr. Miles Cone

**Date completed:** 9/29/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

This CE webinar will examine the evolving role of tooth whitening in contemporary dentistry and its integration across multiple specialties. With the growing demand for minimally invasive treatments, 10% carbamide peroxide has emerged as more than a whitening agent - it offers versatile clinical benefits and revenue opportunities for the entire dental team. Beyond cosmetic applications, this webinar will explore its use in periodontal therapy for hygiene management, in orthodontics as an adjunct for aligner patients, in endodontics for internal bleaching, in oral surgery for wound healing, and even in managing caries risk due to its bactericidal and cariostatic properties. Hygienists and dental assistants will gain practical strategies for recommending and implementing these protocols, making them key players in enhancing patient care and practice growth. Attendees will also learn up-to-date procedures, dispel myths, and discover innovative, low-cost marketing approaches to maximize these benefits across the dental team. During this CE webinar, we will

- Identify the most common etiological causes of tooth discoloration and the treatment options available to patients for treatment with these conditions
- Review the factors which contribute to the efficacy and predictability of the various tooth whitening protocols in the treatment of discolored natural dentition
- Investigate many of the widely held dogmas and myths surrounding current tooth bleaching techniques and clinical recommendations
- Establish evidence-based protocols utilizing various materials and methods for in-office and take-home tooth bleaching strategies to improve successful aesthetic/hygienic dental outcomes for existing patient base

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

**CPD for UK Participants:** This Verification of Participation is designed to satisfy GDC format related to CPD activity for UK participants.

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Unlocking the Power of Facial Scanning: Integration in Daily Digital Dentistry (5231)

**Lecturer:** Dr. Luis de Bellis

**Date completed:** 9/29/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 610

**Description and learning objectives:**

In this CE webinar, participants will explore the full potential of modern facial scanning technology and its newest features. The webinar will demonstrate how advanced facial scanning, mandibular movement tracking, and optimal jaw relationship functions can be seamlessly integrated into digital workflows to enhance precision, communication, and patient outcomes. Attendees will see real-world examples of how these tools can be applied in daily practice—from diagnostics and treatment planning to patient communication—providing an efficient and reliable way to align facial, intraoral, and CBCT data. By the end of the webinar, participants will understand how to implement these innovations to elevate both their clinical practice and the patient experience. By the end of this CE webinar, participants will be able to:

- Identify the newest functions of facial scanning technology and their role in digital dentistry workflows
- Gain familiarity with integrating facial scans with intraoral and CBCT data for improved diagnosis and treatment planning
- Apply techniques to incorporate facial scanning into daily clinical practice to enhance precision, communication, and patient outcomes

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

**CPD for UK Participants:** This Verification of Participation is designed to satisfy GDC format related to CPD activity for UK participants.

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Using Clear Aligners to Set up a Great Restorative Outcome (5223)

**Lecturer:** Dr. Sheila Samaddar

**Date completed:** 9/29/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

Restorative dentistry often delivers the best results when teeth are ideally positioned before treatment begins. This 1-hour CE webinar explores how clear aligner therapy can be used strategically to create a foundation for long-lasting, esthetic, and functional restorative outcomes. Participants will learn how to identify cases where minor tooth movement simplifies restorative procedures, reduces invasiveness, and enhances patient satisfaction. The webinar will cover treatment planning principles, sequencing aligners with restorative phases, and effective patient communication to encourage acceptance of pre-restorative orthodontics. Through case examples, clinicians will gain practical skills to integrate aligner therapy seamlessly into everyday restorative care. During this CE webinar, we will • Identify how malocclusion, crowding, and spacing can compromise long-term restorative outcomes and how pre-alignment improves tooth position for ideal restorations • Explain the principles of restorative-driven orthodontics and how clear aligner therapy can be integrated into comprehensive treatment planning • Demonstrate how to evaluate and sequence cases where minor tooth movement will simplify or enhance restorative procedures • Recognize the clinical and esthetic benefits of achieving proper tooth alignment prior to veneers, crowns, implants, and other restorative treatments • Apply practical strategies for case presentation and patient communication to increase acceptance of pre-restorative aligner therapy

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

**CPD for UK Participants:** This Verification of Participation is designed to satisfy GDC format related to CPD activity for UK participants.

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** The Y's and Why's of Zirconia: Clinical Control Through Smarter Material Selection (5210)

**Lecturer:** Dr. David Rice

**Date completed:** 9/29/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 610

**Description and learning objectives:**

Zirconia has become one of the most widely used materials in restorative dentistry—but with popularity has come confusion. This CE webinar demystifies the evolving landscape of zirconia types (3Y, 4Y and 5Y), indications, clinical protocols and in short why the zirconia you choose will literally make or break your case. Attendees will gain clarity on when to lute, when to bond, and why understanding your material's properties is essential to what we want most - beauty and strength. This webinar bridges science and strategy — guiding you through the critical thinking process behind material selection, cementation protocols, and predictable and repeatable workflows. You will learn to align clinical excellence with operational efficiency while elevating your brand and your profits. By the end of this CE webinar, participants will be able to:

- Differentiate between types of zirconia materials based on strength, translucency, and clinical application to drive predictable - high-quality outcomes
- Decide when to lute and when to bond for beauty that lasts
- Apply a clinical control mindset to zirconia cases by integrating calibrated systems - repeatable processes - and clear team communication
- Develop a team approach to materials and workflows directly supporting great clinical outcomes and profitability
- Gain a better understanding of how laboratories process restorations. If not handled properly, strength and esthetics can be compromised

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

**CPD for UK Participants:** This Verification of Participation is designed to satisfy GDC format related to CPD activity for UK participants.

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** The Next Evolution of the Routine Dental Exam (5221)

**Lecturer:** Dr. Juan Yepes

**Date completed:** 9/29/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 250

**Description and learning objectives:**

Explore how cutting-edge technologies are transforming the traditional dental exam into a modern, patient-centered experience. This CE webinar will introduce innovative tools that enhance caries detection, support early intervention, and streamline preventive care. Learn how implementing these solutions can not only improve clinical outcomes but also drive profitability by increasing case acceptance and expanding preventive service offerings. By the end of this CE webinar, participants will be able to:

- Identify emerging technologies that elevate routine dental assessments
- Understand how integrating these tools can enhance patient education, motivation, and long-term oral health outcomes
- Recognize the business value of prevention-focused innovations, including improved case acceptance and revenue growth
- Develop strategies to implement these solutions seamlessly into clinical workflows

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

**CPD for UK Participants:** This Verification of Participation is designed to satisfy GDC format related to CPD activity for UK participants.

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Holy Cow! I Didn't Know You Could Do that with Composite (5191)

**Lecturer:** Dr. John Gammichia

**Date completed:** 9/9/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

This is not your father's composite webinar. Dr. John Gammichia, a full time private practice dentist, lives in the real world. A world where people break cusps and can't afford a build-up and onlay/crown. So what do you do? Pull it?! How about an exquisite 2,3,4 or 5 cusp composite restoration? Of course, we will start with the class I and the class II restorations. We will of adhesion and some of the current biomimetic philosophy. Then we will build from this knowledge. How do you handle uncomfortably big restorations or deep decay? How about big AND deep restorations? How about cracks? Lastly, we will discuss your obstacles to this type of dentistry...do they last or can I make any money doing dentistry this way? This CE webinar will be fun but Dr. Gammichia wants you to feel a little uncomfortable...you will be challenged. By the end of the webinar you will be saying "Holy Cow! I Didn't Know You Could do that with Composite." Upon completion of this CE webinar, the student will be able to:

- Get excited about doing "fillings" again
- Learn and understand the philosophy on how to do a complex, incredibly beautiful, composite restoration
- Get comfortable doing 3, 4, and 5 cusp composite restorations (and close to the pulp)
- Learn and understand the philosophy on how to deal with cracks and post-endo teeth
- Debunk all the objectives...Yes, they can be fun, yes, they last and yes you can be very profitable doing them

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

**CPD for UK Participants:** This Verification of Participation is designed to satisfy GDC format related to CPD activity for UK participants.

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** CO2 Lasers and Digital Integration: Broadening Your Clinical Capabilities (5209)

**Lecturer:** Dr. Jose Marcano

**Date completed:** 9/9/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 135

**Description and learning objectives:**

Incorporating the 9.3-micron CO2 laser into your digital workflow opens the door to a wider range of treatment options while simplifying many of your day-to-day procedures. This powerful all-tissue laser reduces bleeding, eliminates the need for sutures in many cases, and supports faster, more comfortable recoveries—making it easier to introduce high-value treatments like gingivectomies, frenectomies, flapless crown lengthening, and more. In this CE webinar, Dr. Marcano will share how pairing the 9.3-micron CO2 laser with digital tools such as digital scanners, support better outcomes, smoother workflows, and greater patient satisfaction. During this CE webinar, we will • Explore the science behind the 9.3-micron CO2 laser • Learn how this laser supports soft tissue procedures and integrates seamlessly with digital technologies • Review clinical cases highlighting accuracy, consistency, and excellent results

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Mastering Advanced Isolation Techniques: Elevate Your Chairside Confidence (5205)

**Lecturer:** Ms. Shannon Pace Brinker, CDA

**Date completed:** 9/9/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 250

**Description and learning objectives:**

This CE webinar is designed to enhance the clinical efficiency and confidence of dental assistants and team members through comprehensive training in modern isolation techniques. Attendees will receive hands-on instruction on how to improve moisture control, visibility, ergonomics, and patient comfort using advanced isolation tools. Learn how to become an indispensable clinical partner by perfecting your isolation skills to support the dentist and elevate procedural outcomes. Upon completion of this CE webinar, participants will be able to:

- Understand the clinical benefits of modern isolation tools and how they improve patient care and procedural efficiency
- Identify procedures where advanced isolation techniques provide significant ergonomic and time-saving benefits
- Demonstrate proper insertion techniques and positioning of isolation devices for optimal retraction and suction
- Troubleshoot common isolation challenges and apply techniques to enhance seal, comfort, and stability
- Improve time management and procedural flow through effective communication and setup
- Compare traditional methods (cotton rolls, rubber dams) with modern isolation approaches to determine the best clinical use cases

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

**CPD for UK Participants:** This Verification of Participation is designed to satisfy GDC format related to CPD activity for UK participants.

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Digital Fabrication of Single Tooth Implant Crowns (5095)

**Lecturer:** Dr. Andrew Bruening

**Date completed:** 8/20/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 690

**Description and learning objectives:**

This CE webinar provides an overview to the digital workflow for fabricating single tooth implant crowns. Participants will learn the fundamentals of intraoral scanning for teeth, gingiva, and scan posts, as well as the advantages of full arch vs quadrant scans. The CE webinar covers key considerations such as Ti-base diameter and gingival height selection, restoration design using Exocad software, and the importance of scan body and Ti-base accuracy. Additionally, attendees will explore model design options, including the use of digital analogs and gingival masks versus a modeless approach. During this CE webinar, we will

- Perform accurate intraoral scanning for teeth, gingiva, and scan posts, and understand the differences between full arch and quadrant scans
- Verify scan post seating using radiographs to ensure precise digital impressions
- Select appropriate Ti-base diameters and gingival height (GH) for optimal implant crown fit and function
- Utilize Exocad software to design restorations and models, with a focus on selecting the correct scan body and Ti-base for crown fabrication
- Compare the advantages of models with digital analogs and gingival masks versus a modeless workflow in implant restoration fabrication

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

**CPD for UK Participants:** This Verification of Participation is designed to satisfy GDC format related to CPD activity for UK participants.

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** To Cement or Adhere Zirconia: What Are My Options? (5035)

**Lecturer:** Dr. Todd Snyder

**Date completed:** 8/20/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

There is a lot of confusion regarding how to connect a zirconia restoration to a tooth. Some of the concepts that will be covered are how do you clean or decontaminate the zirconia to what type of cement to use, and can you actually bond to zirconia? This CE webinar will eliminate confusion of how to best deliver a zirconia restoration with various types of materials and preparation designs so that you can remove all of your questions and concerns so that you can become confident with your materials and techniques. During this CE webinar, we will review: • Step-by-step guide on preparing a tooth for a zirconia restoration • Effective methods for decontaminating zirconia prior to placement • Criteria for selecting the best cement based on clinical scenarios • Practical tips and techniques for achieving strong adhesion with zirconia

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. On a weekly basis your CE credits are automatically submitted to the AGD (requires AGD number entered in your Edit Profile page).

Viva Learning is a Nationally-Approved AGD PACE Program Provider for FAGD/MAGD credit.

Approval does not imply acceptance by any regulatory authority or AGD endorsement.

Approval period: 11/1/2021 - 10/31/2025. AGD Provider # 217544

**CPD for UK Participants:** This Verification of Participation is designed to satisfy GDC format related to CPD activity for UK participants.

Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** ABCs in Dentistry: Anterior Esthetics, Bite Splint Therapy, and Cementation (4935)

**Lecturer:** Dr. Michelle Lee

**Date completed:** 8/20/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 730

**Description and learning objectives:**

In this CE webinar, fundamental pearls in treatment planning in anterior esthetic cases will be reviewed along with indications for appliance therapy to help understand treatment position. Predictable luting agents in the cementation process in anterior esthetics will bring the total treatment planning together from start to finish. During this CE webinar, we will • gain insight on understanding evaluating temporomandibular joint in treating anterior esthetic cases • utilize the splint therapy to create predictable dentistry in treatment planning • review current dental luting agents in cementation protocols

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Viva Learning is the approved CE provider

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Utilizing Digital Dentistry in Today's Dental Practice (5047)

**Lecturer:** Dr. Christopher Pescatore

**Date completed:** 8/20/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 610

**Description and learning objectives:**

The goal of this CE webinar is to equip attendees with the knowledge and skills to confidently integrate digital technology into their dental practices, transforming the way they create smiles and interact with patients. By exploring the latest advancements in digital tools and techniques, this webinar provides a comprehensive overview of how to enhance patient education, streamline workflows, and improve treatment outcomes through digital dentistry. During this CE webinar, we will review:

- Understanding how to incorporate digital technology in your practice
- Using digital scanners to not only educate patients, but have them commit to treatment
- Proper scanning techniques and potential pitfalls
- Utilizing analog and digital techniques to your advantage
- Preparation design and its importance in longevity

Viva Learning is in good standing with AGD PACE:

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** To Change or to Repair: How to Treat What's Coming (4119)

**Lecturer:** Dr. Rolando Nunez

**Date completed:** 8/15/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 250

**Description and learning objectives:**

Covid-19 has tremendously affected all of us in different ways. Dentistry is no different. From social distancing and PPE to the way regular treatments are performed, the dynamics between patients and clinicians will be totally different. In some cases, the standard approach to specific treatments will have to be reconsidered in order to be able to solve specific problems that patients will encounter. This CE webinar will cover how to approach adhesive dentistry applied to direct restorations that need to be changed, but avoiding or diminishing post-op sensitivity and how to predictably intraorally repair a PFM structure that has failed. During this CE webinar, the participant will learn • to predictably bond to tooth structure and avoid post-op sensitivity • to take advantage of calcium releasing materials in order to protect the dentin-pulpal complex • the proper bonding protocol to predictably repair an existing PFM restoration

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Don't Make Me Reach: Ergonomics That Fit Your Everyday (5193)

**Lecturer:** Stephanie Botts, RDH, BSDH, CEAS

**Date completed:** 8/15/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 130

**Description and learning objectives:**

A poorly designed operatory doesn't just cause discomfort — it impacts productivity, focus, and long-term health. This one-hour CE webinar explores how smarter layout, cabinetry, and organization support better posture, reduce strain, and improve daily workflows. You'll also learn how operatory design is shifting to reflect the majority-female dental workforce, using updated anthropometric data for better fit and function. Plus, discover surprising research on how clutter increases stress and inefficiency—and what to do about it. Walk away with practical, ergonomic strategies to create a workspace that works with you, not against you. During this CE webinar, we will

- Learn how operatory layout affects clinician posture, efficiency, and injury risk—and discover strategies for ergonomic design
- Understand the link between ergonomic efficiency and improved patient flow, staff satisfaction, and practice success
- Discover how small changes in equipment and storage placement can significantly reduce daily physical strain

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 610

**Description and learning objectives:**

Do the exam, make a diagnosis, present the dentistry that the patient "needs." If they say, "no thank you," educate them so they understand why that is a bad idea. Very logical, generally not very effective. No one wants to buy dentistry and that is what every dental student is taught to sell and then tells their team to sell. We need tools that help us sell what we really need to sell, the stuff the person walked in the practice WITH. The Oral Health Report and ConsulHealth can do that because you can choose to leave off recommended treatment while you focus on the real reason that patient might want dentistry. Upon completion of this CE webinar, attendees will be able to • Understand why logical does not help people decide, logic justifies a decision AFTER it has been made emotionally • Use the tools in the state-of-the-art intraoral scanner software to provide the show that lets you talk about what you SEE, not what you think they should do • Create a system in their practice to stay in the question until the questions come from the patient

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Pushing the Envelope: Direct and Indirect Posterior Solutions with Composite (5116)

**Lecturer:** Dr. Lauren Rainey and Dr. Mauricio Watanabe

**Date completed:** 8/13/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

The science and technology built into dental composite resins is impressive, but rarely do practitioners (or patients) realize how versatile our materials really can be. Direct placement is the most common approach for composite, but by relying on the material science within, predictable indirect composite restorations can also be life-like, strong and long lasting. Join the co-presenters in this CE webinar as they review cases from North and South America as they compare and contrast uses of composite resin in their daily practice. During this CE webinar, we will • understand innovations in composite resin chemistry and materials science • identify areas in restorative practice where direct or indirect composites can be a reasonable alternative to lab fabricated restorations • review step-by-step approaches on how to use composite predictably in large posterior restorations

**Date completed:** 8/12/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

Have you noticed the shift in dentistry? Patients expect their dental care to be easier, delivered in a shorter treatment time, and painless. As clinicians, we understand the benefits of conservative restorative approaches and want to promote them at every opportunity. Given the advancement of early diagnostics, minimal intervention becomes even more paramount using cutting-edge technology. This CE webinar will discuss guiding principles for contemporary adhesive preparations using as little intervention as possible utilizing a new roll-out class of minimally invasive dental burs that provide a major impact. Learn how these burs can navigate a variety of current dental materials and tooth anatomy. During this CE webinar, we will

- Promote minimal intervention approach guiding principles
- Leverage cutting-edge technology to achieve a major impact
- Benefit from adhesion and flowable resin chemistry
- Discover novel uses for this class of burs

**Lecturer:** Dr. Christopher Pescatore

**Date completed:** 8/6/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

This CE webinar will deal with numerous aspects of comprehensive restorative aesthetic dentistry and efficient patient care in today's dental practice. We will discuss how to make routine dental procedures such as adhesion and direct resins more predictable and efficient using the latest material technologies. Also discussed will be the indirect restoration protocol including preparation design for the current restorative materials and the use of impression materials vs digital technologies. Insertion protocols will also be addressed to aide the clinician in developing a foolproof method to deliver high quality, long-lasting restorations. Upon completion of this CE webinar, the attendee will be able to:

- Understand the current adhesive systems as compared to previous generations
- Understand the preparation design requirements for ceramic and zirconia restorations
- Understand the difference between using traditional analog vs digital impression techniques
- Manage tissue properly to aid in the insertion process of indirect restorations
- How to properly treat various indirect restorative materials prior to insertion
- Decide on which insertion technique to use based on the type of restoration

**Course Title:** Forget the Plaster...Printing is the Future (5117)

**Lecturer:** Dr. Susan McMahon

**Date completed:** 8/6/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 690

**Description and learning objectives:**

Gone are the days of messing and inaccurate plaster and stone in dental offices. 3D printing not only is far more efficient and cleaner but it is more accurate and far more versatile. Many types of appliances and restorations can be printed in-office simply and quickly. Of course study models and smile design models are also printed easily. This CE webinar will demonstrate protocols and give instruction for the integration of the team. Give your patients the convenience they demand while increasing your bottom line. During this CE webinar, we will

- Demonstrate printing protocols to replace traditional fabrication of dental appliances, models, and restorations
- Give step by step instructions for training the clinical team to integrate printing into workflow
- Give comprehensive overview of current printing materials
- Demonstrate how printing will decrease lab costs and increase bottom-line production

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** The Value of Being Seen: Elevating Care for People with Intellectual and Developmental Disabilities (5111)

**Lecturer:** Jeannette Diaz, RDH, RDHAP, MS, MPH, FADHA

**Date completed:** 8/6/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 750

**Description and learning objectives:**

Health inequities persist for people with intellectual and developmental disabilities. Individuals with developmental disabilities experience poorer oral health and challenges accessing dental care. Historically, the dental curriculum did not require training dental professionals to care for and manage the treatment of persons with intellectual and developmental disabilities. Providers often report feeling unprepared to care for this population. This CE webinar will evaluate the current barriers to care, identify complex factors contributing to oral health, and equip the dental provider with strategies to improve patient care for people with intellectual and developmental disabilities. During this CE webinar, we will

- Evaluate barriers to oral care for people with intellectual and developmental disabilities
- Identify complex factors related to the oral health of people with intellectual and developmental disabilities
- Explore strategies to improve patient care for people with intellectual and developmental disabilities

**Date completed:** 8/2/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 490

**Description and learning objectives:**

Individuals are experiencing bouts of depression, and/or debilitating anxiety at an alarming rate, and the incidence is rising in the young adult and adolescence population since the pandemic. Chronic stressors and chronic anxiety influence health outcomes of those living with diseases such as CVD, cancer and Type 2 Diabetes. Chronic stress can also have a negative outcome on periodontal health. Lifestyle Medicine comprises four quadrants: Healthy Eating Healthy Weight, Active Living and Emotional Resilience. Discover the possibilities of how healthful living within each of these quadrants can help mitigate chronic stress, depression, anxiety and improve periodontal health. This dynamic CE webinar is divided into Part 1 and Part 2. During this CE webinar, we will • Recognize the impact anxiety, depression and chronic stressors have on wellness • Explore evidence that ties chronic stressors to overall systemic and oral health • Identify how Healthy Eating and Healthy Weight can reduce the impact chronic anxiety has on the body

**Course Title:** Digitally Guided Full Arches and Effortless Precision to Deliver Predictable Outcomes (5189)

**Lecturer:** Dr. Karla Soto

**Date completed:** 7/31/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 690

**Description and learning objectives:**

In this immersive and visually rich CE webinar, Dr. Karla Soto explores how the synergy of digital planning and advanced clinical armamentarium creates a streamlined, confident path to full-arch success. Through real-world clinical cases, including fully digital All-on-X workflows with immediate placement and loading, as well as precision-driven smile design cases (veneers/onlays/crowns), attendees will learn how to bring digital plans to life with practical, predictable results. From guided surgery to clean preps, Dr. Soto demonstrates how leveraging the right tools—combined with foundational knowledge and step-by-step protocols—ensures precision and efficiency in both surgical and restorative phases. Whether you're placing implants or restoring a full arch, this CE webinar will illustrate how to execute digital plans with clarity, control, and confidence. Blending precision with purpose to craft confident, healthy smiles that change lives. Upon completion of this CE webinar, the student will be able to:

- Recognize the importance of integrating digital treatment planning with real-time execution tools for predictable outcomes
- Implement chairside protocols that elevate the patient experience and clinical performance in both surgical and restorative full-arch cases

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Metrics that Matter: Using Prevention Protocols to Drive KPIs and Case Acceptance (5182)

**Lecturer:** Alicia Murria, RDH, MS

**Date completed:** 7/30/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 730

**Description and learning objectives:**

What if preventative care was viewed as a calibrated system that elevated team performance and drove measurable growth? This CE webinar explores how dental teams can use structured prevention tools to align around a shared standard of care, improve patient outcomes, and track the business impact of their hygiene department. Attendees will examine how self-assessments, risk evaluations, and communication tools create consistency across providers, leading to stronger documentation, better case acceptance, and elevated KPIs. The CE webinar will also touch on the impact of prevention on key performance indicators (KPIs), including hygiene production, case acceptance, and patient retention. Whether you're a hygienist, practice owner, or clinical lead, this course will provide practical strategies to turn prevention into profitability—rooted in individualized patient care. Attendees will leave with actionable strategies to strengthen their role as a prevention specialist by enhancing their skills in early risk-identification, communicating findings effectively, and incorporating streamlined tools while boosting clinical efficiency. During this CE webinar, we will • Define the role of the dental professional as a Prevention Specialist within a collaborative care model • Describe how to integrate risk-based preventative tools into daily hygiene workflows to enhance patient understanding and treatment acceptance • Evaluate how self-assessment and guided risk forms support clinical documentation, calibration, and personalized care planning • Recognize the connection between prevention protocols and practice growth metrics, including patient retention, production per visit, and case acceptance

**Course Title:** Dental Implants – Parts, Pieces, Chemistry, and Compatibility (5112)

**Lecturer:** Lynn Pencek, RDH, MS

**Date completed:** 7/30/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 690

**Description and learning objectives:**

We are 40 years since Professor Branemark introduced his research on osseointegration to the dental community. Dental Implants provide our patients with successful long-term restorative solutions for function, comfort, and aesthetics. Today, Dental Hygienists are seeing more patients with dental implants. Implant manufacturers have introduced new implant designs, surfaces, and surface chemistry that affect biocompatibility and maintenance protocols. There are concerns about what materials we use to reduce peri-implant inflammation, may negatively affect the implant surface's biocompatibility and the implant's long-term success. This CE webinar will review dental implant component materials and design and the biological compatibility of commonly used instruments, technology, and therapeutic materials. During this CE webinar, we will • Review the history of dental implant components and surface chemistry • Review of maintenance protocols for prevention of peri-implantitis • Review biologically safe instrument materials to use on dental implants • Identify home care products and techniques safe for implant maintenance

**Student's name:** Dr. Dhaval Dave

**Course Title:** \$10 In, \$10,000 Out: Dental Laser Procedures That Print Profit (5203)

**Lecturer:** Dr. Vivian Roknian

**Date completed:** 7/30/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 135

**Description and learning objectives:**

Most doctors know the LANAP® and LAPIP™ protocols but it's the Value-Added Procedures (VAPS™) that make laser dentistry unstoppable. In this business-forward, no-fluff CE webinar, Dr. Vivian Roknian reveals how to unlock the full financial potential of laser dentistry, turning it from a single-purpose tool into a true practice growth engine. You'll learn how to stack high-yield, low-overhead procedures that diode and erbium lasers simply can't touch—from implant osteotomy detox and hemangioma removal to herpetic lesion treatment, paresthesia recovery and cosmetic upgrades patients are demanding. This CE webinar goes far beyond the LANAP® and LAPIP™ protocols. It's a masterclass in dozens of laser protocols that drive patient satisfaction and revenue while expanding what's clinically possible in your operatory. Whether you already own a laser or are on the fence, this webinar will show you exactly how to increase chair value, scale patient production, and build a more profitable, future-ready practice using minimally invasive treatments.

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Empowering Hygienists to be Healthy, Informed, and Efficient (5195)

**Lecturer:** Brittany Gordon, RDH

**Date completed:** 7/25/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 490

**Description and learning objectives:**

More and more dental offices are booked months in advance and are operating with a limited staff. Dentists expect hygienists to deliver thorough cleanings but with less time allotted for each procedure. I would like to discuss ways to increase efficiency without sacrificing quality. The demands of life make it challenging to keep up with new and innovative technology. I would like to cover the latest technological advancements and products that could lead to better patient outcomes. Finally, I want to address personal health and wellness, which is essential for career longevity. In addition to exploring in-office and home yoga techniques, I would like to conduct a deep dive into anatomy, helping hygienists understand why their bodies hurt and exploring natural options to help them feel their best and perform at their highest level. After the CE webinar you can expect to offer new, highly sought-after services that help keep dental patients from escaping your practice.

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** The Top 3 Infection Control Mistakes You (Probably) Don't Know You're Making (5187)

**Lecturer:** Amanda Hill, RDH

**Date completed:** 7/25/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 148

**Description and learning objectives:**

This compelling CE webinar highlights the top three infection control missteps that occur in dental settings, often without detection. Infection prevention is essential for safe and high-quality dental care, yet many practices may be unknowingly falling short. Explore the causes and consequences of poor waterline maintenance, improper sterilization practices, and incomplete documentation. Through real-world examples and practical tips, attendees will learn how to close these gaps and implement solutions, including digital alternatives, that enhance compliance and efficiency. This webinar empowers dental professionals to raise their infection prevention game with actionable next steps to provide meaningful improvements. During this CE webinar, we will • Identify hidden risks in dental waterline management and understand the implications of poor maintenance • Describe sterilization process errors such as wet packs, overloading, and improper use of cycles • Apply modern documentation practices that replace unreliable paper logs with digital tracking tools

Viva Learning is in good standing with AGD PACE:

**AGD PACE Approved Provider # 217544 through 10/31/2025.** The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. ## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** The Digital Aesthetic and Implant Practice of the Future (5178)

**Lecturer:** Dr. J.B. White

**Date completed:** 7/25/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 690

**Description and learning objectives:**

This one-hour CE webinar will focus on utilizing modern technology to treat a variety of clinical scenarios. The diagnosis and treatment planning will involve facial and intra-oral scanning, digital photography, 3D printed models and CBCT. The digital avatars will be uploaded into the lab design software to help communicate hard and soft tissue position relative to the patients face, and ideal tooth position will be established. The case studies will be presented in a step-by-step process so attendees will be able to visualize the process and repeat it in their own practice. During this CE webinar, we will • Explore an ecosystem of digital tools for better diagnosis and treatment planning • Learn the advantages of digital designs are 3D printed mockups for restorative cases, both composite and ceramic • Compare and contrast intra-oral scan bodies to intra-oral photogrammetry scan flags in the full arch implant patient • Understand the full digital workflow of surgical guide planning, printing and surgical execution

**Course Title:** Restorative Materials and Protocols That Transform Clinical Outcomes (5120)

**Lecturer:** Dr. Sam Simos

**Date completed:** 7/24/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

The success rate of dental restorations varies significantly depending on the restorative material used, and the protocols the clinician employs given the clinical situation. This CE webinar is designed to provide dentists with crucial insights into the most commonly used direct and indirect restorative materials in daily practice and how clinician's strategies and protocols in using these materials impact the success rate of dental procedures, improving both efficiency and outcomes. During this CE webinar, we will

- Understand the critical importance of adhering to manufacturer-specific instructions for different restorative materials
- Develop strategies for creating and maintaining consistent protocols for each restorative material used in practice
- Recognize the potential consequences of deviating from established protocols and the benefits of using materials from the same manufacturer
- Gain insights into the most commonly used direct and indirect restorative materials
- Learn how to adapt material choices to various clinical situations, emphasizing the need for versatility in restorative dentistry

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Managing Complex Aligner Cases: Strategies for Predictable Outcomes (5190)

**Lecturer:** Dr. Bruce McFarlane

**Date completed:** 7/24/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 370

**Description and learning objectives:**

With the increase in popularity and demand for clear aligners, many dental professionals face situations that comprise complex malocclusions and questions on how to achieve the most predictable results. The first step is to choose a system that can deliver in this environment, while also considering potential hybrid treatment plans. Additionally, clinicians need to understand the full aligner journey so that the path to successful resolution is clear and calculated. Upon completion of this CE webinar, the student will be able to:

- Identify clear aligner cases that present with various complexities
- Choose a clear aligner system that is robust enough to address the complexities predictably
- Understand how fixed devices may be used in conjunction with clear aligners to produce predictable results

Viva Learning is in good standing with AGD PACE:

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Zirconia vs. Lithium Disilicate: Different Cementation Protocols Required (5192)

**Lecturer:** Dr. Gary Radz

**Date completed:** 7/24/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 610

**Description and learning objectives:**

Zirconia and lithium disilicate (eMax and others) are the two most common direct restorative materials. Predictable long term cementation success is dependent on the proper pre-cementation treatment and understanding the different cement options available. As we currently do not have a universal it is important to understand the different cement options to make an informed decision. This CE webinar is designed to review the proper pre-cementation protocols and discuss the different cement categories to help the viewer create a workflow and thought process that will increase the predictability of their restorations. During this CE webinar, we will • Review the different categories of cements with a discussion of the benefits of each • Discuss the appropriate protocol for per cementation treatment of zirconia restorations • Demonstrate the pre-cementation steps involved with lithium disilicate restorations

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** The ABC's of Adhesive Bonding and Cementation (5177)

**Lecturer:** Dr. Thomas Dudney

**Date completed:** 7/5/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

As adhesives and cements continue to evolve, change, and improve, it becomes more difficult for restorative dentists to keep up with the latest advances. With increasingly higher patient expectations for long term clinical success, it is important that dentists have an understanding of these materials in order to make sound decisions on what to use when and why. This CE webinar will discuss the different generations of adhesives and categories of cements including those with bioactive properties. Clinical cases will be shown to demonstrate the use of these adhesives and cements including the proper protocols that must be followed. Upon completion of this CE Webinar the student will be able to understand: • The many benefits of universal adhesives • Which cement to use when and why • The necessary steps for treating the tooth and the restoration when adhesively bonding • How to successfully bond zirconia restorations • Bioactivity and the long-term benefits of bioactive cements

**Course Title:** The Power of Laser Dentistry in Pediatrics: From Everyday Care to Frenectomies (5158)

**Lecturer:** Dr. Jared Poplin

**Date completed:** 7/5/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 135

**Description and learning objectives:**

Join Dr. Jared Poplin, DMD, a board-certified pediatric dentist, for an in-depth exploration of how laser dentistry is elevating pediatric care—especially for frenectomies. In this engaging and clinically focused CE webinar, Dr. Poplin will discuss the science behind the 9.3-micron CO2 laser, demonstrating its ability to deliver efficient anesthesia-free restorative dentistry and blood-free soft tissue procedures with minimal discomfort. Whether you are new to laser dentistry or looking to expand your treatment offerings, this CE webinar will provide the knowledge and confidence to explore integrating the 9.3-micron CO2 laser into your pediatric practice. During this CE webinar, we will

- Summarize the science behind the 9.3-micron CO2 laser's efficient, blood-free soft tissue cutting
- Discover how anesthesia-free cavity preparations and blood-free soft tissue surgeries can enhance the experience for young patients and their families
- Understand the rationale for laser-assisted treatment of tongue-tie and lip-tie as it relates to breastfeeding, maxillary diastemas, and speech

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Mastering Attachment Placement and Removal for Clear Aligners (5170)

**Lecturer:** Ms. Shannon Pace Brinker, CDA

**Date completed:** 7/5/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 370

**Description and learning objectives:**

Clear aligners provide an esthetic and functional orthodontic solution for patients of all ages, eliminating the need for brackets, wires, or bands. To ensure successful outcomes, properly placed attachments play a crucial role in guiding tooth movement and aligner retention. This CE webinar will equip participants with expert techniques to streamline attachment bonding, troubleshooting, and removal—optimizing the clear aligner experience for both clinicians and patients. During this CE webinar, we will cover the following:

- How to orchestrate the delivery of attachment appointment
- Aligner template: load, seat, cure, and clean for efficiency
- The crucial role the template plays in patient success
- Understand isolation & direct bonding techniques to keep attachments from failing
- Total etch vs self etching techniques to acquire the highest bond strengths
- Differentiate attachment material and utilization for each: packable, flowable, injectable
- Understand porcelain restorations and how to attachment protocols
- Troubleshooting attachments: replace, rebond, and removal

**Date completed:** 7/4/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 730

**Description and learning objectives:**

Traditional diagnostics involved doing a clinical exam, periodontal exam, and examining a full set of radiographs. As technology continues to innovate the dental operator, the dentist today is faced with a multitude of state-of-the-art options to assist in arriving at that ideal diagnosis. In this CE webinar, join us as we examine the options available to us today, look at what's coming in the near future, and learn how to incorporate these new technologies into our diagnostic landscape. During this CE webinar, we will cover the following: • Artificial Intelligence: How is AI impacting day-to-day dentistry • Modern Dental Imaging Workflows: Can it help us build trust and case acceptance with our patients • CBCT: Why this is a must in today's practice • Looking at the Horizon: Technological advances that will change dentistry in the not-so-distant future

**Date completed:** 7/4/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 610

**Description and learning objectives:**

Dental materials have evolved alongside CAD/CAM technology at a relatively rapid pace. Understanding the fundamental nature and behavior of dental ceramics and cements is an integral part of the decision-making process in restorative dentistry. The correct selection of materials and understanding the limitations of each dental material will help improve clinical success. This CE webinar provides a comprehensive classification of indirect restorative materials and their clinical applications, with the goal of equipping clinicians with the necessary knowledge to evaluate and correctly apply emerging materials. Upon completion of this CE webinar, the participant will

- Understand the current trends in the field of dental ceramics
- Understand the clinical applications of different dental ceramics
- Understand the new generation of dental cement

**Date completed:** 7/4/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

Current economic trends show flat reimbursements, while all of our costs rise. In order to remain profitable, dentists must work more efficiently. Fortunately, we have advances in direct restorative and adhesive dentistry that can allow for working faster and smarter while having great clinical success. This CE webinar will examine the fundamentals of working efficiently and effectively with today's high output curing lights, universal adhesives and bulk fill restorative materials. We will also examine placement techniques that facilitate excellent restorative outcomes. During this CE webinar, we will

- Review universal adhesives and their advantages
- Analyze how bulk fill posterior composites compare to their traditional counterparts
- Discuss curing lights and how high power curing lights can easy procedures

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** When You Get Close to the Pulp, Don't Let It Spoil Your Day (5166)

**Lecturer:** Dr. Scott Coleman

**Date completed:** 7/3/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 070

**Description and learning objectives:**

The most used materials in today's general practice are burs, bonding agents, and composites for direct restorations. The evolution of this group of materials, in particular, is amazing. Today's light cure resins are light years ahead of the materials that we thought were great 20 years ago. The evolution of materials includes base or lining materials when the proximity to the pulp requires some form of pulpal protection. Calcium has been proven to be a critical adjunct to the armamentarium of all general dentists performing routine decay excavation and tooth restoration. This CE webinar is designed for the busy dentist who wants to stay current with the available materials and concepts of efficient placement of tooth-colored restorations. We will discuss what matters most in pulpal protection material selection, depending upon location and occlusal load put on the restoration. Reduction and elimination of post-operative sensitivity will be addressed. After completing this CE webinar, participants will be able to:

- identify the current materials and capabilities of leading bases or liners
- comprehend zero sensitivity bonding protocols
- explain how often this category of material is applied

**Date completed:** 7/2/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

With so many choices in materials and available cements, chaos may ensue when deciding to lute or bond each restoration. There has to be a better way to understand and ensure long-term success for our restorations. This CE webinar is designed for the attendee to gain confidence in their cement selection and handling of each restoration. By the end of this CE webinar, attendees will:

- understand the key differences between luting and bonding, and when to use each
- learn how to select the appropriate cement for various materials and clinical scenarios
- develop confidence in handling cements and following standardized protocols
- troubleshoot common issues in cementation to ensure long-term restoration success

**Course Title:** The Builder and The Carver (5183)

**Lecturer:** Dr. Ross Nash and Dr. Drew Ballard

**Date completed:** 7/2/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

In this engaging one-hour CE webinar, participants will explore two distinct techniques for creating direct composite veneers. Attendees will gain insight into the methodical, layer-by-layer approach of “The Builder,” focused on controlled anatomy and shade development, contrasted with the artistic, sculptural style of “The Carver,” emphasizing form and contour from the outset. Through clinical demonstrations and expert commentary, this webinar highlights the strengths, indications, and nuances of each technique—empowering clinicians to expand their skill set and refine their aesthetic outcomes. Perfect for dentists looking to elevate their direct veneer artistry with practical, real-world applications. Upon completion of this CE webinar, participants will:

- Understand the basic principles of composite veneering
- Appreciate the different approaches to planning a direct composite veneer
- Learn clinical techniques to achieve aesthetic and replicable direct restorations

**Course Title:** Healthful Living in a Stressed-Out, Anxious World - Part 2 (5181)

**Lecturer:** Karen Davis, RDH, BSDH

**Date completed:** 7/2/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 490

**Description and learning objectives:**

Individuals are experiencing bouts of depression, and/or debilitating anxiety at an alarming rate, and the incidence is rising in the young adult and adolescence population since the pandemic. Chronic stressors and chronic anxiety influence health outcomes of those living with diseases such as CVD, cancer and Type 2 Diabetes. Chronic stress can also have a negative outcome on periodontal health. Lifestyle Medicine comprises four quadrants: Healthy Eating Healthy Weight, Active Living and Emotional Resilience. Discover the possibilities of how healthful living within each of these quadrants can help mitigate chronic stress, depression, anxiety and improve periodontal health. This dynamic CE webinar is divided into Part 1 and Part 2. During this CE webinar, we will • Identify how Active Living and Emotional Resilience can reduce the impact chronic anxiety has on the body • Identify four quadrants of "Lifestyle Medicine for the Mouth" to preserve oral health • Recognize the unique role the dental professional has as an advocate for healthful living strategies

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Aligner Attachments Perfected: Stop Stressing & Stop Guessing! (5113)

**Lecturer:** Dr. Foroud Hakim

**Date completed:** 7/2/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 370

**Description and learning objectives:**

The global clear aligner market is anticipated to reach a staggering \$6.84 billion annually by 2028. Translation, millions of new cases will be initiated annually by both GPs and Orthodontists each year. Whether you are just tip toeing into these waters, or fully immersed, it's critical to understand that successful case outcomes depend heavily on the mechanical advantage provided by leveraging attachments during treatment. If you find yourself asking the following questions, this CE webinar is for you: 1. What is the most efficient way to rapidly, predictably, and accurately place attachments? 2. Why are some patient's attachments falling off? 3. Why can't I successfully place attachments on a crown? 4. Why do attachments start to stain around the periphery? 5. Does it really matter if my attachments look a little washed out? 6. What is the best way to quickly & fully remove attachments after treatment is complete without any harm or changes to the teeth or native restorations? During this CE webinar we will learn: • Revolutionary new materials that are designed specifically for attachment delivery • The A through Z of bonding attachments to any and all surfaces including enamel, traditional ceramics, and yes, even zirconia! • Best practices for isolation, efficiency, and accuracy – “removing the pain points” • Taking the guesswork and stress out of attachment removal, leaving the surface as healthy as you found it

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** A New Era in Conservative Esthetic and Adhesive Dentistry (5175)

**Lecturer:** Dr. Michael DiTolla

**Date completed:** 7/2/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

This CE webinar will examine how technology has made it possible for clinicians to turn any prepped veneer case into a no-prep case, making our treatment much more conservative, and more acceptable to the patient. With today's high-strength ceramics and adhesive cementation protocols, veneers can be made as thin as 0.3mm, making esthetic no-prep veneers possible, if the teeth are in the correct position and you're utilizing an esthetic, adhesive cement. No-prep veneers are more difficult to seat than prepped veneers or crowns, and a live demonstration will show a seating technique to mitigate those difficulties and the proper cementation protocol to create lasting, esthetic restorations. After viewing this CE webinar, attendees will learn:

- The rationale for turning prepped veneer cases into no-prep cases
- The software necessary to plan and execute an esthetic no-prep veneer case
- How to choose the best cement solution based on the clinical indications
- How to use an esthetic veneer cement to adjust the final shade of the veneers when necessary
- Proper cementation technique for a no-prep veneer case
- A technique to place no-prep veneers to ensure that microscopic shifting of the veneers doesn't keep them from seating properly

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Advancing Periodontal Care with the 9.3-Micron CO2 All-Tissue Laser (5185)

**Lecturer:** Dr. Jeffrey Rohde

**Date completed:** 6/27/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 690

**Description and learning objectives:**

Periodontal disease affects nearly half of U.S. adults — and yet many general dentists continue to refer these cases out due to the complexity and invasiveness of traditional treatments. In this CE webinar, Dr. Jeffrey Rohde shares how the 9.3-micron CO2 all-tissue laser can transform the way you approach periodontal care. Dr. Rohde will introduce a new application that leverages the 9.3-micron CO2 laser to simplify the treatment of periodontal disease. He will show how this minimally invasive approach promotes new clinical attachment and sustainable pocket reduction, delivering predictable results and keeping patients more comfortable. He'll also share how he's using the laser for other procedures like crown lengthening and extractions. During this CE webinar, we will

- Explain how the 9.3-micron CO2 laser enables minimally invasive treatment of periodontitis
- Identify clinical scenarios where the 9.3-micron CO2 laser can replace traditional scalpel-and-suture techniques
- Understand the workflow integration of the laser into a general practice setting

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Top Infection Control Violations of 2024/2025 (5188)

**Lecturer:** Dr. Karson Carpenter

**Date completed:** 6/27/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 148

**Description and learning objectives:**

This one-hour CE webinar is presented by Karson L. Carpenter D.D.S., president of Compliance Training Partners, and will review top infection control violations seen over the past year. The webinar will allow participants to see areas in which they may be vulnerable to citation and fine and provide practical solutions for preventing them. Participants will receive access to a detailed infection control compliance audit application that will allow them to evaluate their facility and formulate a plan for achieving full compliance. Upon completion of this CE webinar, participants will be able to:

- Understand their responsibilities under CDC Guidelines for Infection Control
- Know how to delegate responsibilities to key staff members
- Identify areas of non-compliance in their practice
- Implement an easy-to-maintain infection control program in their facility

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Tech-Savvy Hygienist: Transforming the Patient Experience with Cutting-Edge Technology (5108)

**Lecturer:** Alicia Murria, RDH, MS

**Date completed:** 6/27/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 550

**Description and learning objectives:**

As the role of dental hygienists continues to expand, staying ahead of technological advancements is key to providing exceptional patient care. This CE webinar is tailored for dental hygienists eager to harness the power of technology to transform the patient experience. From digital scanning and AI-enhanced diagnostics to innovative patient communication platforms, attendees will learn how to integrate modern tools into their workflow, improving patient education and enhancing case acceptance for proactive interventions. Participants will gain practical knowledge of how to optimize technology for seamless patient interactions, from initial diagnosis through treatment planning. The webinar will cover strategies to effectively use technology to overcome common patient barriers to treatment acceptance and improve case presentation skills. By the end of the session, attendees will feel empowered to elevate their practice through technology, leading to improved patient satisfaction and increased revenue. During this CE webinar, we will:

- describe the benefits of integrating these technologies into daily practice
- understand how intraoral scanners and AI diagnostic tools aid in case presentations to demonstrate treatment options and enhance patient comprehension
- recognize a workflow that incorporates digital tools into routine hygiene appointments, tailored to improving patient engagement and ensuring consistent case acceptance
- summarize options for prevention-based treatment options and how to optimize preventative care

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Mastering Resin Infiltration for Predictable Results (5176)

**Lecturer:** Irene Iancu, BSc, RRDH, CTDP, OM

**Date completed:** 6/19/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 780

**Description and learning objectives:**

This practical, case-based CE webinar provides an in-depth look at how to successfully implement resin infiltration in your practice. We'll discuss lesion assessment, effective techniques, the role of pre-whitening in esthetic results, and what sets resin infiltration apart from traditional approaches. You'll learn from real clinical cases, including both successes and failures, to refine your approach and optimize patient outcomes. This webinar will provide actionable insights to elevate your confidence and results. During this CE webinar, we will review • Lesion Identification and Case Selection: Learn how to assess lesion type and depth using photography, light amplification, and transillumination for precise treatment planning • Optimizing Techniques and Comparisons: Explore best practices, including pre-whitening protocols, increased infiltration time, micro-abrasion, and polishing techniques, while understanding how resin infiltration compares to other caries arrest management options • Troubleshooting and Success Strategies: Gain practical insights from real cases, including common pitfalls, failed attempts, and how to refine your approach for better outcomes

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** Treating Trauma: Materials and Methods that Work for the General Dentist (5165)

**Lecturer:** Timothy Bizga, D.D.S.

**Date completed:** 6/4/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 070

**Description and learning objectives:**

After this CE webinar, you will leave with practical knowledge of managing trauma in the GP practice setting that you can begin incorporating into your practice the very next day. Case reviews, technology, and products will be discussed. During this CE webinar, we will

- Learn how to manage trauma from a restorative perspective
- Discuss material options and outcomes of care
- Review clinical cases for application of principles and concepts

## VERIFICATION OF PARTICIPATION

**Student's name:** Dr. Dhaval Dave

**Course Title:** The Surgical Mind of the GP - LIVE SURGERY (5169)

**Lecturer:** Dr. Todd Engel

**Date completed:** 6/4/2025

**Method:** Electronically Mediated

**Credit type:** Self-Study (1)

**Credit hour(s) earned:** 1

**AGD Subject Code:** 690

**Description and learning objectives:**

How to effectively use technology to minimize the “dental phobic” or apprehensive patient. Dental phobia is real and something which is admired when discussed by the less than apprehensive patient. Implementing technology which has potential to create a positive dental outcome and visit is imperative for these patients. Come join us LIVE and watch the impact of this experience for yourself. During this CE webinar, Dr. Engel will be performing a live single implant immediate procedure, with the implementation of piezo-surgery, as an adjunct to the care.
